

## REMARKS

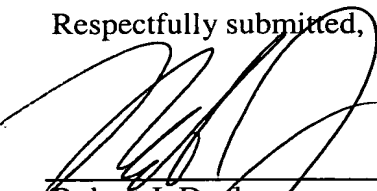

Applicant respectfully requests reconsideration of the restriction requirement set forth in the last office action with respect to claims 11-13. Applicants submit that due to the similarity of the claims, simultaneous search and examination of all claims will not put an undue burden on the Examiner. Accordingly, Examination of all claims in a single application is appropriate.

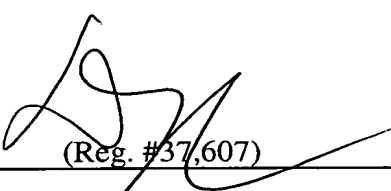

In response to the new grounds of rejection set forth by the Examiner, Applicant has amended the claims to include an additional requirement that the specified parts be secured in a fixed permanent relationship. The art of record provides no teaching or suggestion whatsoever regarding the claimed invention. The art cited by the Examiner are directed to much different technology and those skilled in the manufacture of imaging devices would not look to the cited art in order to solve the problem of temporarily securing imaging devices for providing a permanent fixed relationship. Furthermore, there is no teaching or suggestion in these references to make the structure as now claimed.

Accordingly, in light of the foregoing, Applicant requests that the Examiner now withdraw the rejections and allow all claims in the application.

Respectfully submitted,

Date: June 13, 2003
